MP 12380 ID Finger Print Door Lock

After removing the handle and the locking mechanism from the wooden, plastic and metal doors, the door handles with fingerprint function and the lock in the set are mounted to the front and back of the door.

The product is battery-powered and can be supplied with a passing energy for approximately 1.5 years based on 50 entry and exit circulation per day. In this way, no energy cables will be needed. It gives "battery low" warning in the last 100 passes near the end of the battery. Access can be done by fingerprint, card or password. In addition, entry and exit can be done with mechanical switch or remote control. When the door handle is lifted up, it locks with 3 steel cylinders.

Technical Specifications

Surface Treatment	Fashion silver, red bronze, red gold	Resolution	500 DPI
Universal Lock Body	Double quick lock body	Operating Current	<= 250mA
Opening Mode	Fingerprint, password, M1 card, remote control, key	Working Temperature	(-10 > 60) C
Lock Function	Anti-lock function	Working Net Degree	20C-93C
